

The waterproof tags featured on this website are created to solve a number of industry specific needs. Most items are custom made to customers needs. Some are off-the-shelf items ready to use.

There are a number of different things we can do to create a waterproof tag custom suited to your needs.

Tags can be **personalized** with your business name, contact information, license number etc. from many of our tags samples such as backflow inspection tags, lobster crate tags, shipping tags, etc.

Tag contents can be modified on most of our sample tags to adapt them to your needs when required.
